Summary

Information Systems undergraduate who enjoys turning real operational problems into working software. Built and deployed OptiCare, a full-stack commercial system now running in a real eye clinic, gaining hands-on experience across the backend, database design, and system architecture with Java, Spring Boot, and React. Seeking a Backend Developer Internship to keep learning while contributing to production-grade systems.

Education

VNU-HCM University of Information Technology

Sep 2024 - Present

Bachelor of Management Information Systems

CGPA: 8.3/10.0

Nguyen Chi Thanh High School for the Gifted

Sep 2021 - May 2024

Class of Informatics, Lam Dong

Personal Projects

OptiCare - Eye Clinic Management System

Jun 2026 - Present

Full-stack Commercial Software (Solo Project for Real Clinic)

- Tools & technologies used: Java 21, Spring Boot 4, Spring Security, JPA/Hibernate, React 18, Electron, SQLite, Gemini API
- Engineered a layered RESTful backend with 70+ endpoints across authentication, sales/POS, inventory, and reporting modules, implementing JWT-based Role-Based Access Control and centralized request validation.
- Architected a normalized SQLite database and migrated 2,000+ real customer profiles, 1,700+ inventory items, and supplier data from the clinic's legacy system.
- Ran a 2-week UAT with real clinic data, processing 30-50 daily transactions, and authored complete technical documentation (API reference, database schema, architecture diagrams); production rollout scheduled for Aug 1, 2026.
- Repository: github.com/trmai-19/opticare-management-system

Pharmacy Management System

Semester 2, Year 2

Desktop Application Development (4-Person Academic Project)

- Tools & technologies used: Java, Spring Boot, JavaFX, Oracle DB, Docker
- Acted as Tech Lead, managing the GitHub repository and coordinating development tasks across the 4-person team.
- Developed the Spring Boot backend, designed the JavaFX frontend, and constructed the Oracle DB schema.
- Implemented complex PL/SQL triggers and stored procedures to ensure data integrity and seamless backend integration.
- Repository: github.com/trmai-19/Pharmacy-Management-System

Technical Skills

Languages: Java, C++, Python, SQL, TypeScript/JavaScript

Backend & Databases: Spring Boot, Spring Security, Spring Data JPA/Hibernate, REST APIs, Oracle DB, SQLite

Tools & Basics: Git, Docker, JWT, React, JavaFX, Electron

Achievements

Second Prize, ICPC Vietnam National Programming Contest (High School Division) 2023

Third Prize, ICPC Asia Hue City Regional Contest (High School Division) 2023

Codeforces Expert, Max Rating: 1738 2022 - Present

Participant, Vietnam National Olympiad in Informatics (VOI) 2024

Participant, VinUniversity Datathon 2026
